ENVIRONMENTAL ACTIVITY MANAGEMENT SYSTEM

Member 3: Areej Batool

UC-13 Rank Areas

ID	UC-13
Name	Rank Areas
Primary Actors	Admin
Stakeholders and Interests	To track progress of each area and to create awareness about environmental activities around people, areas need to be ranked as per performance.
Pre-Condition	Areas have been defined and some activities must been performed by them.
Post-Condition	Areas progress can be tracked.
Main Success Scenario (Basic Flow)	1) Admin: take measure of activity scheduled by each area. 2) Admin: take measure of activity completed by each area. 3) Admin: calculate ratio of activity scheduled to activity completed * 100 of each area. 4) System: rank areas on the basis of their ratio in ascending order. 5) System: shows a bar graph of rank areas.
Extension (Alternate Flow)	3) Calculation error; review each measure taken.
Special Requirements	None
Technology and Data Variable List	Internet and any smart device must be available.
Frequency	Once a week.
Special Issues	None
